## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see p. 2-3 of the response, filed March 1, 2006, with respect to claims 1-24 have been fully considered and are persuasive. The rejection of claims 1-24 under 35 U.S.C. 102(b) as being anticipated by Reich et al. ("High-Fill-Factor, Burst-Frame-Rate Charge-coupled Device," International Electron Device Meeting and IEDM Technical Digest, pp. 567-570, December 2001, hereinafter referred to as the "Reich" reference) has been withdrawn.
2. As stated above in p. 2-3 of the response, filed March 1, 2006, the Reich reference is not available as prior art under 35 U.S.C. 102(b) because of the provisional application 60/394125.

### ***Allowable Subject Matter***

3. Claims 1-24 are allowed.
4. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests or renders obvious a charge-coupled imaging device having an array of super pixels which each have independently controlled subpixels which can independently collect and store photogenerated charge at a specific frame by using the exact electronic shuttering mechanism as explicitly disclosed by the applicant.

Art Unit: 2826

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
